Re: Application for [Job title]

Dear [Mr/Ms Surname — or "Hiring Team"] ,

I am writing to apply for the [Job title] role at [Company] , which I saw on [where you found it] . I am a web developer and digital marketing executive at Fameline Holding Group, where since 2023 I have run the full stack of digital for a group of maritime and trading brands, from hand-coding production websites to running the campaigns that drive traffic to them.

Today I manage a portfolio of 50+ live web properties: I have shipped six fully hand-coded corporate sites (no CMS) using AI-assisted development workflows, built and maintained WordPress sites that score 90+ on mobile Lighthouse, and run email marketing to B2B lists of 8,000+ contacts with top campaigns reaching ~50% open rates. I also grew the group's LinkedIn from ~1,000 to 7,500+ targeted industry followers. The full portfolio, with live links to every site, is at xaralamposg9.github.io/portfolio.

[One or two sentences about WHY THIS COMPANY — mention something specific: their product, a site of theirs you admire, their market. This is the sentence that shows the letter is not a template.] I believe the combination of hands-on development and full-funnel marketing is exactly what lets one person own a website end to end: build it, rank it, and grow its audience.

I would welcome the chance to discuss how I can contribute to [Company] . I am available for an interview at your convenience and can be reached at +357 96 425378 or charfotiou@gmail.com.

Thank you for your time and consideration.

Kind regards,

Charalampos Photiou
